Glen Echo Park Report
National Park Service representative Aaron LaRocca reported that the contractor was recently approved to begin the roof restoration at Clara Barton House. The house has been closed since October for a two-stage project that will include installation of a fire suppression system next spring after the roof restoration is completed.

The Glen Echo Park management agreement between the Park Service, Montgomery County, and the Glen Echo Parks Partnership for Arts and Culture is set to expire in 2017. Montgomery County is currently in the process of drafting a new agreement and will provide it to the Park Service soon.

In November, Mr. LaRocca, the Mayor, Council Member Matney, and Valerie Beckel, the Park Service trails supervisor, walked the Union Arch Trail connecting MacArthur Boulevard to the C&O Canal. They identified several issues with trail conditions, including broken railroad ties and eroded steps, and discussed how the trail can be improved. The plan is to contact adjacent communities such as Bannockburn and Cabin John to start a community volunteer effort next spring to improve the trail with supervision from the Park Service. Mr. LaRocca stated that he was excited about this kind of project and that it is in line with the goals established for the centennial year of the National Park Service. Details need to be worked out, but it’s possible that the Park could provide materials for the project. The discussion also included procuring materials through corporate donations and opportunities for Boy Scouts looking for Eagle Scout projects or Walt Whitman students working on class-related Environmental Science projects.

2 Vassar Circle
Unless you’re living under a rock, you’ve heard about the development of 2 Vassar Circle. Mr. Aaron Hirsch is planning to demolish the existing church structure and subdivide the property to build homes on four separate lots. In November, Mr. Hirsch submitted a plan for development and roadway improvements on Vassar Circle. There was a robust discussion of support and opposition to this plan on the town listserv leading up to the planned vote at the December Council meeting. The vote did not take place because of updates to the plan and a formal waiver request from Mr. Hirsch.

In early December, Mr. Hirsch updated the plan and submitted a formal waiver request to the road construction ordinance the Council passed in June 2014. Mr. Hirsch’s development plan includes paying for all road improvements to achieve a minimum 28-foot road width for safety as required by the ordinance but it also results in the loss of some existing parking spaces around the circle. With the goal of increasing roadway safety, the ordinance requires a transfer to Town ownership of all property within 25 feet of the center of a roadway before subdivision can occur. The ordinance also includes a clause that specifically allows the Council to waive any provisions of the ordinance that may “deprive the subdivider … of all reasonable use of the property.”
The waiver requests that the Town accept a Public Improvement Easement as an alternate approach to a transfer of property ownership to satisfy the desired roadway safety measures without preventing Mr. Hirsch from subdividing the property into four lots. The Town must give residents 30 days to review the proposal and hold a public hearing before granting a waiver, so the Council voted to schedule a special hearing on this topic on January 25.

The most recent plan and waiver have been sent out for review on the listserv and are also available for review in the Town Hall. The Council has requested written comments to the plan be submitted by January 18.

The Town Business
The Council discussed ongoing efforts to curtail stop sign violations at Oxford and University. The Park Service recently installed a stop sign on the left side of Oxford to help the situation. Various solutions, including a stop sign lit with LEDs, stop sign cameras, and moving the existing speed bump have been discussed many times in the past. The Council agreed that moving the speed bump appears to be the next step that should be taken and they will contact Washington Gas to see if they will do this as part of the recent gas installation process.

Holly Shimizu asked the Council to send a letter to Montgomery County supporting the ban on the use of pesticides for cosmetic use. She was asked to provide a draft letter for the Council to review and discuss at the January Council meeting.

—Bill Vincent

Town Expenses
In November, the Town paid $10,400 to Charles Cooley Stonework for sidewalk repair, $5,940 to Dennis Alexander, auditor, and $4,176 to Waste Management of Maryland.
The December 12 Town holiday party was a huge success with every seat in the house filled and then some. Residents savored a delicious brunch at festively decorated tables and children made gingerbread houses and enjoyed their annual yuletide sugar highs.

This is the time of year to meander through your garden and decide what you want to change, rearrange, or improve. I want my garden to be a home for birds, butterflies, frogs, and other life. I want to create a dynamic space where I can connect with the surrounding environment of Glen Echo as well as the unique ecological diversity of the Potomac River Gorge. The stretch of 15 miles from Great Falls to Georgetown is home to more than 200 rare plant and animal species and natural communities. We should not take this “natural wonder” for granted. It’s critical that we do not include invasive plants in our gardens as they are apt to escape into the nearby natural areas. Also, the use of pesticides will have a negative impact on our birds and butterflies and wash into our waterways and ultimately into our drinking water.

My porch is a great place for bird watching and this is one aspect of my garden that I can enhance with the addition of certain plants. For example, I see pileated woodpeckers on surrounding trees. They tap into trees searching for carpenter ants, but I know there are berry plants they also love. A good example is the delicious fruit of downy serviceberry (Amelanchier arborea). It is a small tree, gorgeous in every season with lovely white spring flowers followed by reddish, purplish fruit, brilliant fall color, and attractive winter bark. The delectable fruit resembles blueberries although they have an even sweeter taste. Fruit of most Amelanchier species are highly attractive to a host of birds including cedar waxwings, catbirds, mockingbirds, orioles, and many more.

Birds, together with butterflies and bees, are known to be highly attracted to elderberry (Sambucus nigra ssp. canadensis). The dark blue fruit makes a delicious jam for humans and is a favorite food for a range of birds including brown thrashers, Eastern bluebirds, Baltimore orioles, American goldfinch, and scarlet tanagers. Butterflies and bees adore the nectar-rich white flowers that appear in June.

Another excellent choice is bayberry (Myrica pensylvanica) shrub as the fruit is a favorite for many songbirds. It is a semi-evergreen shrub and makes a fine hedge or windbreak. You must have male and female plants; male to pollinate and female to produce the fruit. In September, once the fruit ripens, it is a treat for Carolina wrens, tufted titmice, and tree swallows. Since the birds do not have teeth for chewing the fruit, the outer coating is digested and the seed moves through the digestive tract allowing the bayberry a chance to propagate itself.

The stunning purple fruit of the American beautyberry (Callicarpa americana) are a garden show-stopper and will attract many fall migrants and other berry-eating birds into the garden. The northern bobwhites, eastern towhees, thrashers, finches, and woodpeckers will all feast on your American beautyberry plants. This shrub is a graceful, fast growing native of the southern U.S.

Back in the early 1990s, I worked with garden designer and writer Carole Ottesen. She wrote a book, The Native Plant Primer, about the design and installation of a native garden in Bartholdi Park at the U.S. Botanic Garden. Once planted, the Garden immediately became a rich habitat where humming and buzzing sounds could always be heard. Her design success provided me with an opportunity to demonstrate the concept “Plant it and they will come” because that is exactly what happened! —HOLLY SHIMIZU
A well-timed introduction to Glen Echo was accomplished by the Epanchin family (Pete, Becky, 4½-year-old Colby, and one-year-old Lara Tatsiana) when they attended the Town’s December 12 holiday party, a week before moving into their new home. They are the new owners of 38 Wellesley—the longtime home of Jim and Carlotta Anderson, our dearly departed town icons. Town residents welcomed them warmly, and a list of available babysitters in town was initiated.

Pete was raised in San Rafael, California, in Marin County. His family lived in Africa for part of his youth, because of his father’s position with an international engineering firm. He earned his bachelor’s degree from UC Santa Cruz (Environmental Science), his PhD at UC Davis (Ecology), and he completed a postdoc at Berkeley—having made the rounds of the University of California system!

Although Becky Epanchin-Niell was born in southern California, she lived in Massachusetts from the 4th grade until high school graduation, whereupon she returned west, earning a bachelor’s degree from Stanford in Earth Systems. She then lived in Reno, Nevada, for seven years, working as a biologist specializing in Nevada and California butterflies. While in Nevada, she earned a master’s degree, after which she went to UC Davis for her PhD (Agricultural and Resource Economics). The couple first met in Nevada, when Becky escorted Pete (then working for the U.S. Fish and Wildlife Service out of Sacramento) to butterfly field sites—her expertise being the Carson wandering skipper, an endangered butterfly species. However, their relationship only began later when, coinciden-

tally, they ended up in the same class at Davis.

A year after completing their doctorates, Becky and Pete came east for her dream job at Resources for the Future in DC where she does research on environmental policy. Pete continued to work on his postdoc research from their two-bedroom apartment in Adams Morgan. Three months after arriving in Washington, Colby was born, and Pete was a stay-at-home dad for just over a year. Upon obtaining a fellowship from the AAAS, he first worked for the U.S. Environmental Protection Agency. After a year there, he moved to USAID for two years as a Fellow. He has since moved into a staff position at USAID, working on climate change. Meanwhile, the family grew with the addition of “Lara T.”

They learned of Glen Echo when their online house hunting brought them to the Wellesley Circle house. They explored the neighborhood, chatted with people they met while walking around the town, and read *The Echo* online. “It just felt right.” Before moving in, the house was upgraded, with electrical, roofing, and flooring work, and the installation of new windows. “We are just doing the basics now; plumbing is next. Once we move in, we’ll have a better sense of the space and any additional work we want done.” They look forward to gardening and landscaping in the spring and welcome any tips, ideas, or visions. Julia Wilson—Jim and Carlotta’s daughter and a town resident—said that she knows that her now-deceased parents would have picked the Epanchins as the new owners.

Both children will attend the Goddard School on Goldsboro Road, although they will miss the phenomenal (and free) pre-K program at H.D. Cooke in DC and the day care arrangement for Lara T. Next fall, Colby will join the many Glen Echo children attending Bannockburn Elementary School. Pete and Becky have checked out the bicycle commuting paths to downtown, hoping to continue to make bicycling their primary mode of transportation to work.

While sitting in their large back yard that backs on woods and hovers above the Parkway, the C&O Canal, and the Potomac River, they have begun a list of bird sightings, to be followed by other critters who show up. Pete, a devoted birder, was thrilled to learn that Roger Tory Peterson, the eminent ornithologist, had long rented the stone house next door at 42 Wellesley. The Epanchins welcome everyone to share stories of the Anderson family, so they will learn more of the legacy now entrusted to them.

—Gloria Levin
New Year’s Resolution: Host a dinner party and make a pot au feu. This French “pot on the fire” is the fanciest peasant food I can think of, especially when broken into courses: first, the clear, hot broth; second, the marrow scraped from the bones on toasted bread with mustard, horseradish, and salt sides; and third, the meat and vegetables. This dish is the opposite of easy, but it certainly dazzles. It’s been on my mind recently with the passing of Chuck Williams, whose recipe I use, though he suggests simply serving the meat, veg, and marrow in broth all at once.

In a large soup pot, combine chicken stock and water in equal parts (say, 3 quarts of each). Add a bouquet garni in a cheesecloth bag, including one leek sliced, 2 bay leaves, and 2 Tbsp black peppercorns. Add 3½ lb beef brisket and 4 beef shanks with marrow bone. Bring to a boil and simmer on medium heat for 20–30 minutes, skimming any foam off the top.

Partially cover the pot, reduce the heat to low, and simmer about 2½ hours, continuing to skim any foam. Now it’s time to add your vegetables: equal parts (say, 8 of each) of leeks sliced lengthwise and kept connected at the base, carrots halved lengthwise, and baby potatoes scrubbed. Add salt if needed, and simmer until the veggies are cooked, 20–30 minutes. Remove the bouquet garni; taste and adjust seasoning as needed. The meat will need to be sliced (brisket) or broken apart (shank meat).

Enjoy the flavorful, clear broth and toast to good health in the New Year.

Indulge in the rich marrow spread on grilled or toasted bread, with sides of salt, Dijon mustard, and horseradish cream sauce, and toast to somewhat good health in the New Year. Savor the rustic simplicity of the meat and vegetables and toast to a very full and happy New Year. —EMILY PARSONS

Most of the digging and traffic control on Goldsboro near MacArthur this year has been due to the WSSC’s water main replacement program as well as a water main break. Some of the work had to be repeated, WSSC says, because “unfortunately we had a bad contractor do some shoddy work and we had to go back in.”

WSSC told The Echo that some of Goldsboro’s pipes were over 75 years old and those primarily cast iron pipes have a lifespan of roughly 50 years. The Commission said one third of its 5,600 miles of water mains are 50 years or older. The new pipes are ductile iron and are “lined,” which means they have a protective sheath around them. WSSC said they should last well over 100 years in the ground.

“The good news is that once we’ve completed that work, you won’t likely see WSSC in that area for quite some time,” a Commission spokesman said. — LE LAND SCHWARTZ

Call me for all your Real Estate needs!
The Town’s Christmas trees will be picked up by Waste Management on Mondays in January. Also, going forward, recycling will be picked up on Mondays along with yard waste. Regular trash pick-up remains on Tuesdays and Fridays. And a reminder that large item pick-up is the last Friday of each month.

Glen Echo “ambassadors” Zachary, Aaron, Heather and Shannon Kraus went to Geneva over the Thanksgiving break to nurture friendly relations with Glen Echo expats Maddox, Nora, Nicole Fraser and Harley Feldbaum. Rumor has it a good time was had by all. The Feldbaums were gracious hosts as they explored Geneva, including excursions to French markets, the Alps, castles, and the occasional water park. Following their stay in Geneva, the Krauses continued their delegation to Paris and London.

There are plans in the works for an updating of the Little Falls library. A recent fundraising appeal announced that the original “refresh” had been planned for this calendar year but will definitely happen in 2016. The Friends of Little Falls library will support by contributing to the cost of the renovations, and expanding on what the County is able to provide. New purchases are planned for the Children’s Room.

The Town Council has scheduled a special hearing regarding Aaron Hirsch’s request for a waiver of the ordinance which is currently stalling development of 2 Vassar Circle. The hearing will be on January 25 at 8 PM. Like last month, the most recent plan and waiver have been sent out for review on the listserv and are also available for review in the Town Hall. The Council has requested written comments to the plan be submitted by January 18.

Montgomery Parks has two indoor ice rinks, Cabin John Ice Rink and Wheaton Ice Arena. Both rinks offer an assortment of programs for all ages including lessons, general and special skating sessions, and rental times. Each rink has a warming room, a pro-shop, a snack bar, coin-operated lockers, and skate rental. Skate sharpening for your own skates is also available.

The Glen Echo Center is getting a new sign to replace the original one, which possibly dates back to the 1970’s and still lists Pepperidge Farm and State Farm as occupants. The sign will be built by Concept Unlimited of Columbia, South Carolina, and has to meet numerous Montgomery County signage regulations. The Center’s tenants have not yet decided on whether the sign should be vertical or horizontal, but it will be lit at night.

Tired of the increasing traffic during your commute? Dust off your resume and apply for the Managing Director position now hiring at Adventure Theater. You could walk to work with your boss, Artistic Director and fellow Glen Echoan Michael Bobbitt. You can find the job posting at Idealist.org.

The special thrill of seeing Santa ride through town on a firetruck was a little disappointing this year. The truck (and several other emergency vehicles) drove down University and
Around both Vassar and Wellesley Circles at 9:45 PM on Friday, December 18, sirens blaring. Said one disappointed Glen Echo mom, “The kids who are excited about seeing Santa had already been in bed for hours.” Said another, “Kind of seems like they should just turn off the siren after 8:30 PM.” Attempts to get a comment from the Glen Echo Fire Department, which provides this holiday treat, have so far been unsuccessful.

The beautiful wooden train at the Bannockburn Nursery School has been a cherished part of that neighborhood play-ground for 25 years. It can be repaired no more, so the school is raising funds to replace it. If you’ve ever enjoyed an afternoon of imaginative play there with a child or remember it when you were a kid and want to pitch in, you can help Save the Train at bannockburnnurseryschool.com.

Real Estate Report
The only thing to report: The new house at 37 Wellesley Circle is under contract!
